Work History

- 2022-01 -
2023-03

Full Stack Web Developer

Sportality, Taguig
 - Worked on website design, layout, and functionality for various sports teams onboarded to the Sportality platform using Vue 3, Vuex, Pinia, and Tailwind
 - Worked on different Microservices used by the Sportality sites, most of which are implemented using NestJS with MongoDB and MySQL
 - Reviewed code, debugged problems, and corrected issues.
 - Worked with a geographically dispersed team composed of members from the Philippines and from Sweden, with regular standup and alignment meetings to determine timelines and delivery.

- 2018-07 -
2021-12

Full Stack Developer

BXB Inc, Makati
 - Worked on the BXB platform including desktop and mobile web application, API and database integration using Ionic, Angular, SASS, PHP, and MS SQL Server
 - The system allows users to register, take out a loan, and monitor their profiles using the end-user side of the BXB platform mobile web application
 - The system also onboarded companies as admin users to monitor their company's loans, employees, other admin accounts, as well as generate and view reports using the admin-user side of the BXB platform web application
